Summer 2018

The Association of Corporate Counsel (ACC) is pleased to present our *2018 Global Compensation Report*. For companies seeking to stay competitive in the marketplace and lawyers considering career moves, access to detailed compensation data is essential. This report provides insight on compensation trends from over 5,000 in-house counsel across 65 countries, making it one of the most in-depth self-reported compensation surveys for legal department professionals available.

Specifically, the report includes data on base salaries, performance-based bonuses, total compensation, equity-based pay, and retirement/pension plans across a number of important segments. These include job title, organization tenure, in-house tenure, law degree year, legal practice area, industry, organization revenue, number of organization employees, number of department employees, number of lawyers, company ownership structure, global region, and gender.¹

We first include a methodological scope of the project along with definitions of terminology and in-house legal department job titles used throughout the report. We then present a set of key findings that describe important trends and insights, followed by a demographic summary of the survey participants and an aggregated set of question by question survey results. Finally, we include full statistical distributions of base salary, bonuses, and total compensation by job title and across all segments and conclude with presenting the results within three countries: the US, Australia, and Canada.

Access to key data is essential to make the right decisions. When it comes to compensation, both in-house counsel and legal operations professionals will profit from the indispensable survey data shared by fellow corporate lawyers. We hope the *ACC 2018 Global Compensation Report* proves useful for all of your compensation-related needs.

Online Interactive Compensation Dashboard

We also offer a 12-month subscription to an online interactive dashboard that allows users to examine compensation in more depth than what a static document offers. This tool allows users to select any of 15 different filters to focus on the precise combination of segments of interest. If you are looking to slice and dice the data to meet your specific needs and create unlimited custom benchmarking reports, this is the tool for you.

About ACC

The Association of Corporate Counsel (ACC) is a global bar association that promotes the common professional and business interests of in-house counsel who work for corporations, associations, and other private-sector organizations through information, education, networking opportunities, and advocacy initiatives. ACC's research is accomplished through surveys, benchmarking, focus groups, and many other services. With over 43,000 members employed in over 10,000 organizations in 85 countries, we connect our members to one another and to the people and resources necessary for their personal and professional growth.

¹See *Definition of Terms* section for segment definitions.

PROJECT OVERVIEW & METHODOLOGY

Project Overview

This survey opened on March 9, 2018 and closed on May 15, 2018. A total of 5,353 lawyers and legal operations professionals participated with 5,026 respondents who completed the survey. Eighty-two percent of completed responses reported being ACC members (n=4,113). Among members, a total of 38,535 members were invited to complete the survey with a response rate of 10.6 percent. Additional invitations to participate were sent to ACC prospects, lapsed members, non-ACC members via additional purchased samples, and other email outreach campaigns.

Interpreting the Data

Due to rounding, some table and chart percentage totals may not sum to 100. Tables may not reflect 100 percentage points where “Don’t know/not sure” is not shown. Further, some response categories were collapsed in the presentation of results to provide a clearer or more holistic summary of the data.

Additionally, some results presented by certain segments have relatively low sample sizes. When a sample size of less than five respondents occurred, we removed any results because the size is too small to generalize and draw conclusions for that segment.

Currency: Respondents were able to enter all financial information in their local currency. Our survey program automatically converted all foreign currency into US dollar amounts at the exchange rate set on the day the information was entered. All dollar amounts reported are expressed in US dollars (US \$).

Statistical Terminology

Mean: This is the average value of all relevant observations. The values of each observation are summed together and then divided by the total number of observations.

Median: This is middle value of all observations ordered from low to high (also called the 50th percentile). In a list of numbers from one to 11, the median value is six. In a list of numbers from one to 10, the median value is 5.5.

Percentile: This is a value that divides a population according to a distribution of observations. It allows us to know the percentage of observations that fall above or below a particular value. For example, if we find that the median number of lawyers in a department is three (50th percentile), we then know that 50 percent of departments have more than three lawyers and 50 percent have fewer than three lawyers.

Histogram: A histogram graphically displays the full distribution of observations by indicating the number of data points that lie within a range of values. We present the distribution of responses to each compensation-specific survey question in the Overall Survey Results in order to provide a visual interpretation of the results.

DEFINITION OF TERMS

BASE SALARY

Base salary includes earnings prior to any adjustments in taxes, insurance premiums, retirement plan contributions, bonuses, or other benefits/compensation.

BONUS

Bonus specifically refers to performance-based cash bonuses, the criteria of which is established by one's organization. This does not include one-time signing bonuses or special awards that are variable.

TOTAL COMPENSATION

Total Compensation includes the value of base salary, all options, awards, and bonuses.

STOCK OPTIONS

Stock Options are incentives in which a company gives employees the right to buy the company's stock at a preset price for a defined number of years into the future.

STOCK (RESTRICTED SHARES)

Restricted shares give the employee the right to acquire shares of the company's stock, by gift or purchase, once certain restrictions such as tenure or performance targets are met. These shares vest to an employee over time.

DEFINED BENEFIT PLAN

Defined benefit plans are retirement plans based on factors such as compensation and length of service at the time of retirement. You typically make no individual contribution to these plans.

DEFINED CONTRIBUTION PLAN

Defined contribution plans base your retirement benefits on the individual contributions that you make (e.g., "401(k)" plans in the US, "Registered Retirement Savings Plan (RRSP)" in Canada, "Superannuation" in Australia).

ORGANIZATION TENURE

Organization tenure refers to the length of time one has worked at one's current organization.

IN-HOUSE TENURE

In-house tenure refers to the length of time one has worked as in-house counsel. We are specifically referring only to working in-house at an organization, not doing corporate work at a law firm.

LAW DEGREE YEAR

Law degree year refers to the year in which one received a first-level law degree. E.g., Juris Doctor (J.D.), Bachelor of Laws (LL.B.).

INDUSTRY

Industry refers to the industry sector in which an organization operates based on the Standard Industry Classification (SIC) scheme.

ORGANIZATION REVENUE

Organization revenue refers to an organization's worldwide 2017 gross revenue.

LAW DEPARTMENT BUDGET

Law department budget refers to the total inside and outside spend budgeted annually. The budget was only asked of the heads of legal departments and the heads of legal operations.

ORGANIZATION EMPLOYEES

Organization employees refers to the total number of employees in an organization.

DEPARTMENT EMPLOYEES

Department employees refers to the total number of employees in a law department, including all locations.

DEPARTMENT LAWYERS

Department lawyers refers to the total number of lawyers in a law department, including all locations.

ORGANIZATION TYPE

Organization type refers to an organization's ownership structure: public, private, state/government owned, or other.

IN-HOUSE JOB TITLE DEFINITIONS

**GENERAL COUNSEL/CHIEF LEGAL OFFICER/
HEAD OF LEGAL**

The most senior legal officer in the company who is responsible for determining the company's overall legal policy and strategic direction in support of the organization's long term objectives. The position may have substantial responsibility for additional business units. The GC/CLO will often counsel the CEO and other high ranking executives on current and anticipated legal and business matters impacting the company.

**TOP COMPLIANCE EXECUTIVE/CHIEF
COMPLIANCE OFFICER**

The most senior compliance position who is responsible for designing, implementing, and enforcing a corporate compliance program. Ensures that the organization has a comprehensive understanding of relevant regulations and educates management concerning compliance requirements. Secures the resources and authority for effective compliance implementation.

DIRECTOR OF COMPLIANCE

This position supports the Top Compliance Executive by developing the operation plans necessary to implement the organization's compliance program. Educates and trains staff of all levels throughout the organization and promotes a culture of compliance by advising executives and others of the advantages of a strong compliance program.

DEPUTY GENERAL COUNSEL

This position supports the GC in implementing the company's overall legal strategy and may have a primary responsibility for one or more business or legal practice areas. There may be one or more Deputy GCs who report directly to the GC.

DIVISION/REGION/SUBSIDIARY GENERAL COUNSEL

The most senior legal officer of a particular division of the legal department, regional focus area, or of a decentralized standalone subsidiary company. May advise executive leadership on legal issues and risk impacting the division, region, or the subsidiary. Provides direction and leadership to legal professionals and support staff and typically manages overall engagement with outside counsel.

ASSOCIATE GENERAL COUNSEL

This position supports the GC and Deputy GC in the development of the company's overall legal strategy. Provides leadership and direction to a staff of managing lawyers and other department professionals who support the legal needs of one or more business units or practice areas.

ASSISTANT GENERAL COUNSEL

This position supports the GC and Deputy GC in the development of the company's overall legal strategy. Provides leadership and direction to a staff of managing lawyers and other department professionals who support the legal needs of one or more business units or practice areas.

CORPORATE/COMPANY SECRETARY

This is typically a senior-level position that serves as the central point of contact on a variety of communications and issues with the company's Board of Directors. Responsible for planning and conducting board meetings, managing the agenda of Annual Shareholder meetings, and has general oversight in relation to corporate governance.

MANAGING COUNSEL/LEGAL DIRECTOR

A management-level lawyer who typically supervises a group of lawyers providing legal services. The group may be organized around a specific area of law (e.g., patent), with responsibility for all or part of a business unit or corporate function. This position may manage all or part of the internal operations of the law department.

SENIOR COUNSEL

A highly experienced lawyer who has major matter, team, or client responsibilities and may have some supervisory responsibility for other lawyers on a project-specific basis. This position is not a member of the senior management team that set overall strategy of the law department. May serve business units or provide technical legal specialty support.

LEGAL COUNSEL/COUNSEL

This position may have significant case responsibilities but has no management role. Provides legal advice and recommendations for action and may receive specific direction from management or more senior law professionals as to the outcomes and schedules expected. Analogous to a law firm associate.

HEAD OF LEGAL OPERATIONS

Senior-level professional supporting the GC and/or CLO with strategic and operational management responsibility, including budgeting, systems administration, office operations, and law department staffing. May also be responsible for performance measurement and benchmarking. Other titles for this position include: Chief Operating/Operations Officer and Director of Legal Operations.

MANAGER OF LEGAL OPERATIONS

Professional responsible for a portion of legal operations, such as outside counsel and vendor management, financial management, technology management or process improvement, often with direct reports at the individual contributor level.

KEY FINDINGS

Highest paying industries for general counsel

The highest-earning general counsel (GC) can be found in the biotechnology and life sciences and the technical research and development sectors.¹ In both industries, the top 5 percent are paid at least \$3.3 million in annual total compensation. Median compensation for biotechnology GCs is \$346,000 while that of GCs in technical research and development (R&D) is lower, at \$265,000.

TOTAL COMPENSATION AMONG GC BY INDUSTRY

TOP FIVE INDUSTRIES	95th percentile
Biotechnology/life sciences	\$3.3 million
Technical/R&D	\$3.3 million
Accommodation/food services	\$3.1 million
Agriculture/forestry/fishing/hunting	\$2.3 million
Fast-moving consumer goods/consumer services	\$2.1 million

Although the highest median bonuses can be found in the mining/quarrying industry (\$150,000) and the fast-moving consumer goods/services sector (\$147,500), the top end of bonus amounts are earned in the technical R&D and entertainment sectors. In both industries the top 5 percent of earners collected a seven-figure compensation package last year.

VALUE OF PERFORMANCE-BASED BONUSES AMONG GC BY INDUSTRY

TOP FIVE INDUSTRIES	95th percentile
Technical/R&D	\$3.0 million
Arts, sports, entertainment/recreation	\$1.9 million
Telecommunications	\$924,000
Chemicals/plastics	\$923,000
Aviation/aerospace	\$776,000

TOTAL COMPENSATION BY JOB POSITION

		Median	95th percentile
Standard in-house legal positions	GC/CLO/head of legal	\$243,000	\$1,137,421
	Deputy GC	\$280,000	\$875,000
	Division/region/subsidiary GC	\$253,399	\$593,000
	Associate GC	\$240,000	\$512,000
	Assistant GC	\$224,200	\$466,603
	Corporate/company secretary	\$265,179	\$1,100,000
	Managing counsel/legal director	\$233,412	\$460,000
	Senior counsel	\$195,496	\$373,362
Compliance — specific positions	Legal counsel/counsel	\$125,000	\$235,997
	Top compliance executive/chief compliance officer	\$290,000	\$1,092,500
Legal operations — specific positions	Director of compliance	\$202,000	\$465,000
	Head of legal operations	\$189,063	\$464,037
	Manager of legal operations	\$120,000	\$275,000

Note: The job titles above are not necessarily ordered by seniority. For example, the head of legal operations is often a high-ranking position, while different levels of GC are often more senior than a compliance director. See the In-House Job Title Definitions section for complete title descriptions.

¹We use the terms general counsel, chief legal officer (CLO), and head of legal interchangeably. See the In-House Job Title Definitions section for complete title descriptions.

In-house earn more in public companies than in privately owned companies

Base salaries, performance-based bonuses, and total compensation are all consistently higher in public companies than in private companies, and by a wide margin in some cases. Median base salaries for all in-house legal positions are nearly \$25,000 higher in public companies than in private ones, and there is a \$48,000 difference when comparing total compensation. At the GC level, median total compensation is significantly higher in public companies (\$399,000) than in private companies (\$225,000). The gap between public and private is as prominent for non-GC in-house lawyers as well, with those in public companies reporting a median total compensation of \$225,000 as opposed to \$165,000 in private companies.

COMPENSATION BY ORGANIZATION OWNERSHIP STRUCTURE

	Base salary	Performance-based bonus	Total compensation
	Median	Median	Median
Privately owned	\$161,759	\$25,000	\$186,000
Publicly owned	\$185,000	\$40,000	\$234,227

Seniority and tenure are key factors influencing compensation

It should come as no surprise that seniority in legal position and length of tenure significantly affect compensation levels. We present the median and top 5 percent values in total compensation across our standard list of in-house legal positions, compliance-specific positions, and legal operations positions. Increases in compensation are relatively large when moving from a non-management-level position (legal counsel) to a management-level position (managing counsel/legal director). However, these large increases begin to diminish at the more senior levels (assistant GC through heads of legal) and show a steadier upward trajectory.

The number of years worked at one's organization as well as years worked in-house overall are directly related to compensation levels. The median total compensation for all survey respondents with one year or less working in-house is \$135,000 and steadily increases over time with a median of \$200,000 over six to 10 years and \$300,000 with over 20 years in-house. A similar trend holds true for years worked at an organization (regardless of work experience prior to one's current job). Total compensation with less than one year of experience at an organization is \$170,000. It increases to a median of \$229,131 after six to 10 years and reaches \$310,000 with a tenure of 20 years or more.

TOTAL COMPENSATION BY ORGANIZATION AND IN-HOUSE TENURE

	Organization tenure	In-house tenure
	Median	Median
1 year or less	\$170,000	\$135,000
2 to 3 years	\$185,000	\$155,000
4 to 5 years	\$194,186	\$175,537
6 to 10 years	\$229,131	\$200,000
11 to 15 years	\$260,000	\$241,972
16 to 20 years	\$292,275	\$274,000
20 or more years	\$310,000	\$300,000

Capital markets and antitrust are top earning practice areas for male and female in-house counsel

In-house counsel specializing in capital markets, securities, and finance earn a median total compensation of \$280,000—37 percent more than the median of all respondents. The median of lawyers working in mergers and acquisitions, and antitrust and trade regulations is \$252,000 and \$246,000, respectively. The top five highest-paying practice areas also include environmental regulation and employee benefits/executive compensation, with counsel working in these specialties earning a median total compensation of \$240,000.

The top 5 percent of those compensated are in practice areas that largely align with those that have the highest median salaries, with the sole exception being government relations. Those in this practice area are not in the top five in median salaries but do break the top five when considering the top end of earners. The top five percent of earners in each of the top five practice areas make over \$1 million in total compensation, with capital markets/securities/finance the highest at \$1,200,000.

TOTAL COMPENSATION BY LEGAL PRACTICE AREA (ALL JOB POSITIONS)

	Total compensation		
	n=	Median	95th percentile
	Median	Median	Median
Antitrust/trade regulation	539	\$246,214	\$1,060,000
Bankruptcy	182	\$221,000	\$650,000
Capital markets/securities/finance	614	\$280,000	\$1,200,000
Companywide compliance	1,490	\$214,819	\$800,000
Contracts — commercial	3,000	\$196,636	\$594,000
Contracts — government	752	\$185,000	\$578,972
Corporate governance	1,661	\$225,000	\$910,000
Cybersecurity/IT governance	817	\$214,500	\$875,000
Data privacy	1,319	\$200,000	\$650,000
Employee benefits/executive compensation	552	\$239,682	\$1,000,000
Employment and labor	1,468	\$210,000	\$657,000
Environment (regulatory only)	252	\$240,000	\$875,000
General corporate/commercial	2,906	\$203,000	\$700,000
Generalist/non-specialist	1,193	\$200,000	\$608,000
Government relations/regulatory (excluding environment)	595	\$224,000	\$1,098,613
Healthcare	487	\$220,000	\$650,000
Industry-specific specialist	754	\$203,725	\$595,000
International	805	\$228,000	\$850,000
Intellectual property — general	1,320	\$210,000	\$673,000
Intellectual property — licensing	802	\$207,900	\$550,000
Intellectual property — patent	413	\$238,000	\$617,428
Intellectual property — trademark	685	\$208,109	\$570,000
Litigation	1,517	\$220,000	\$758,000
Mergers and acquisitions	1,233	\$252,000	\$1,050,000
Property and casualty/insurance	411	\$200,000	\$788,000
Real estate	901	\$210,000	\$700,000
Tax	188	\$226,500	\$750,000

Note: Respondents were able to select multiple practice areas. Green cells indicate the top five most highly compensated practice areas by median and 95th-percentile values.

Legal operations field flourishing in the United States and in larger companies

Heads of legal operations earn a median total compensation of \$189,063, while the median total compensation for managers of legal operations is \$120,000. However the top 5 percent of heads of legal operations make at least \$464,037. The top five percent of legal operations managers make a minimum of \$275,000. Legal operations managers top out at \$309,000 and head of legal operations maximum salary is \$673,000. Thirty-eight percent of legal operations professionals in small legal departments with less than 10 lawyers have a distinct legal operations function compared with 74 percent in departments of 50 lawyers or more.

Legal operations respondents are mainly from the United States (73 percent); followed by Europe, 8 percent; the Asia-Pacific region, 5 percent; Latin America, 5 percent; Canada, 3 percent; Africa and the Middle East, 2 percent.

COMPENSATION BY LEGAL OPERATIONS POSITIONS

	Base salary	Performance-based bonus	Total compensation
	Median	Median	Median
Head of legal operations	\$150,000	\$37,750	\$189,063
Manager of legal operations	\$112,000	\$15,199	\$120,000

Expats earn more than their local in-house peers

Two percent of respondents indicated they work in a location outside of their home country. The median total compensation for those working abroad is substantially higher than that of respondents working in their home country — the survey results indicate that expatriates receive \$252,000 compared with the \$204,000 that the latter earn. Expats make up a small proportion of respondents overall.

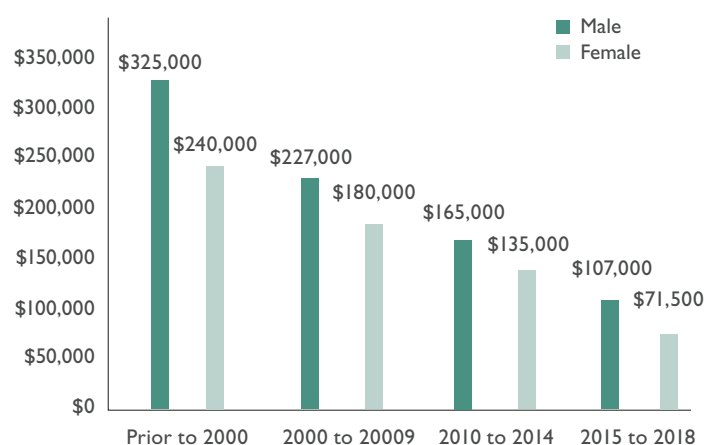

Thirty-eight percent of expatriates say their compensation is similar that of their local peers; 23 percent believe their compensation is more consistent with that of the country they come from; and another third of respondents do not know or are not sure. Only in Switzerland do most foreign counsel believe their compensation is comparable to that of their local peers (64 percent). In Singapore (46 percent), the United Arab Emirates (45 percent), and the United States (42 percent), less than half of expatriates believe their pay is commensurate with the pay of their local peers. Finally, only 11 percent of expatriate respondents in the United Kingdom think they are equally compensated than their British colleagues.

Women earn less than men, but gender compensation gap among new graduates is smaller than in previous cohorts

The compensation gap between men and women at the GC level is significant, with males earning a median of \$270,000 in total compensation compared with \$210,000 for females, despite having

similar experience levels overall and in their current position. The gender compensation gap shrinks for GCs who received a degree after 2009, indicating more parity for newer lawyers. For example, the disparity in median compensation among GCs who received a law degree after 2015 is \$35,500 — less than half of the gap found among GCs who received a law degree before the year 2000 (\$85,000).

TOTAL COMPENSATION AMONG GC BY GENDER AND LAW DEGREE YEAR

The median base salary for entry level in-house legal counsel (those in a position for one year or less) is \$110,000 for females and \$120,000 for males; women make 91 percent of what men earn. In terms of additional compensation, median performance-based bonuses are \$10,319 for women and \$13,000 for men, which means that male in-house lawyers entering the in-house field between 2017 and 2018 report 26 percent more in bonus than their female colleagues report.

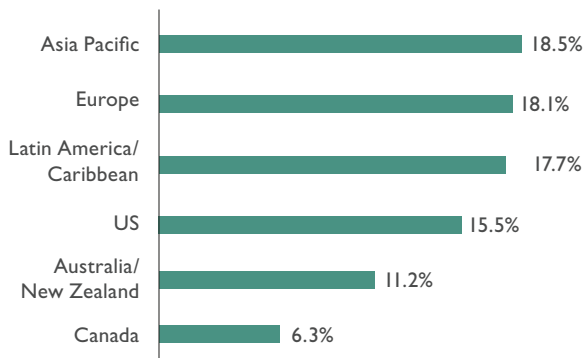

Trends among recent graduates, new to in-house

In terms of previous experience, 14 percent of recent graduates (lawyers who obtained their law degrees in 2015 or later) worked in a law firm before going in-house, 6 percent worked in government, and 5 percent worked in-house but in a position outside of the legal department. Recent graduates report a median total compensation of \$90,000. Seventy-nine percent began their career in the legal counsel role. The median base salary of women who graduated after 2015 is \$80,000 compared with men at \$87,125. The percentage with an experience level in an in-house position of one year and as a lawyer in any position of two years is roughly the same for male and female respondents.

Fifteen percent of lawyers surveyed moved directly into a corporate legal department

Some lawyers are moving straight to in-house law departments, bypassing law firms, government, and academia. Overall, 15 percent of all survey respondents reported going directly in-house after law school. At 6 percent, in-house counsel in Canada were least likely among regions/countries studied to start their legal career in-house, while 18.5 percent of respondents in Asia Pacific say they went directly in-house after law school.

DIRECT FROM LAW SCHOOL TO IN-HOUSE BY REGION

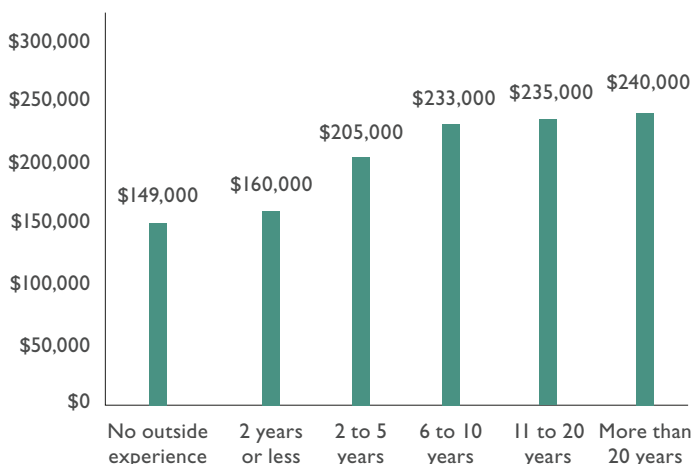

Even a little outside legal experience pays off for in-house counsel

Eighty percent of respondents worked in a law firm prior to going in-house, 13.2 percent worked in a regulatory-related government position, and 9.3 percent worked in a different department in the organization outside of the legal department. All of this outside experience has a positive effect on compensation levels.

Having at least two years of experience in a law firm before moving to an in-house counsel role results in a considerable compensation increase over lawyers who have worked only in-house. There are

MEDIAN TOTAL COMPENSATION BY YEARS OF OUTSIDE EXPERIENCE

no significant differences in compensation between those having outside experience in government and in a law firm. The median total compensation of counsel who have worked only in-house is \$149,000, whereas the total compensation of counsel who have outside experience is higher. Lawyers who have up to two years of outside experience earn a median of \$160,000, and those with two to five years earn a median total compensation of \$205,000.

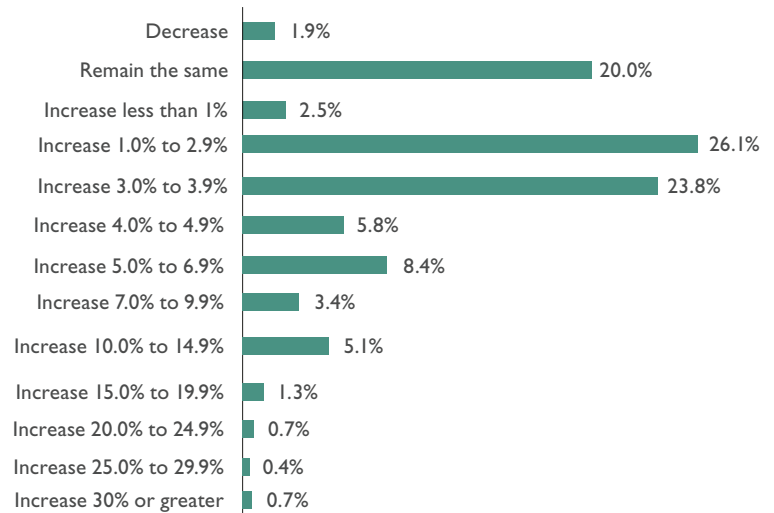

In-house counsel expect salaries will continue to rise

Last year, overall compensation increased for three-quarters of survey respondents. Only 3 percent of respondents declared that their compensation decreased in 2017, while a quarter reported that it remained the same. Among those who received a raise, 25 percent declared a moderate increase of less than 3 percent, while 24 percent reported an increase in compensation between 3 and 5 percent, and another 24 percent declared they received an increase of 5 percent or more.

Seventy-eight percent of in-house counsel expect some salary increase next year. GC have the greatest expectation for salary growth across all job categories, with 26 percent expecting an increase of at least 5 percent. This is likely because more senior positions often receive stock options and restricted shares, which on average have a potential growth value that is higher than one's base salary. Only 26 percent of GCs expect their compensation in 2018 to remain the same. Assistant GC (12 percent), managing counsel/legal directors (14 percent), and directors of compliance (16 percent) anticipate no change in their compensation this year.

One quarter of in-house counsel in private companies expect compensation gains in 2018 of at least 5 percent next year compared to one in six in public companies. Lawyers in the biotechnology and life sciences industry overwhelmingly expect (85 percent) a salary increase this year, while 31 percent of counsel in entertainment and recreation sector envision a raise of 5 percent or more in the coming year.

EXPECTED CHANGES IN TOTAL COMPENSATION (NEXT 12 MONTHS)

DEMOGRAPHIC SUMMARY

JOB TITLE

	n=	Percentage
General Counsel/Chief Legal Officer/Head of Legal	1,332	26.5%
Top Compliance Executive/Chief Compliance Officer	149	3.0%
Director of Compliance	85	1.7%
Deputy General Counsel	380	7.6%
